

## EcoLyzer BW (funded project)

<b>Description:</b>	Demonstrator for series Electrolyzer
<b>Technology:</b>	Alkaline pressure electrolysis
<b>System pressure:</b>	up to 30 bar
<b>Electrical power:</b>	up to 1MW
<b>Hydrogen quantity:</b>	up to approx. 20kg or 220Nm <sup>3</sup>

### Special features:

- Technology transfer from valid demonstrator to industrial product suitable for series production
- Development of a customer-oriented, modular system design in a building block system
- Standardized interface for water treatment plant
- Consideration of customized pressure boosting and H2 delivery systems
- Variable heat recovery
- Establishment of supply chains
