

Test stand for stacks up to 500 kW_{el}.

Description:	Test stand for stacks up to Ø 3,000 mm
Technology:	Alkaline pressure electrolysis
Electrical power:	up to 500 kW
Hydrogen quantity:	up to approx. 10 kg/h or 110 Nm ³ /h

Special features: designed for flexible operating conditions

- System pressure: 5-30 bar
- Current and voltage regulation each over wide range down to <10% of nominal power (like laboratory power supply)
- Flexible connections for different stack types
- Appropriately controllable potassium leach supply
